

KIOSK PT7000

An affordable digital photo printing solution, ideal for independent retailers

The Kiosk PT7000 has been designed to suit the requirements of retailers who want to be able to offer an affordable digital printing solution to their customers, such as independent outlets. Available as either a counter top version or on a pedestal, the PT7000 accepts all of the major digital camera media, CD's and data from USB sticks; images can also be sent via Bluetooth™ mobile camera phones. This kiosk comes with Mitsubishi's CP9550DW-S dye sublimation printer that produces full colour, durable, touch dry photographs in 3.5"x5", 4"x6", 4.5" x 6", 5"x7", 6"x8" and 6"x9" formats.

Additional printers can be connected for multiformat printing in addition to Mitsubishi's CP3020DE printer which can produce larger format 8"x10" and 8"x12" photographs. The PT7000 also features extensive editing options including red eye reduction, colour correction, zoom and cropping; as well as a 'decoration' function for borders, frames and calendars.
