

Changes for the Better

Digital Photo Technology

CP3020DAE

High Quality Digital Photos in an Instant

Large format 8" x 10" and 8" x 12" dye sublimation printer

Mitsubishi Electric's CP3020DAE 8" x 10" and 8" x 12" photo printer is perfect for all professionals who need to offer a cost-effective, fast and simple large format printer that can be used with either a PC or a Mac, or with any of Mitsubishi's Kiosk and Click systems.

The CP3020DAE improves on the performance of its predecessor, now with a longer thermal head life and enhanced printing quality and clarity. It also features fast image transfer with USB 2.0 and offers the choice of either glossy or semi-matt finish prints. The reliability and quality of this printer makes it ideal for numerous applications from social and event photography to use within photo studios.

- **Dye Sublimation Technology**
- **High speed with USB 2.0**
- **8" x 10" and 8" x 12" print sizes**
- **Glossy or semi-matt finish**
- **Windows & Mac compatible**

CP3020DAE

MITSUBISHI ADAPTIVE MANAGEMENT (MAM) ENGINE

With an optimised thermal head, the Mitsubishi CP3020DAE ensures high definition photos and the finest detail in image reproduction. The high speed image transfer via the USB2.0 connection ensures efficient transfer from a PC, MAC or Mitsubishi Kiosk/Click, resulting in a consideration reduction in printing time.

LONG-LIFE HEAD: GUARANTEED QUALITY

A new protective covering on the thermal head increases the life of the head considerably
